

Brand Guidelines:

Kno2 Connected™

Overview

These guidelines outline the requirements for Kno2 partners integrating Kno2 APIs into their products and services. The purpose is to ensure consistent brand attribution to Kno2, promote brand recognition, and to protect and clearly communicate the proprietary value of being "Kno2 Connected™."

Brand Mission & Definition

Brand Mission

Since its founding, Kno2 has been leading the future of healthcare communication. With a mission to democratize healthcare communication, enabling seamless and secure interoperability across the healthcare ecosystem, Kno2 connects partners, providers, payers, and patients through a single, powerful API. Kno2 empowers healthcare organizations to achieve their digital transformation objectives, solving some of healthcare's greatest challenges and unlocking the true potential of clinical information exchange.

What does it mean to be Kno2 Connected™?

Being **Kno2 Connected™** means harnessing the power of healthcare's largest communication infrastructure and healthcare network through a simple integration to a patented API. Being Kno2 Connected™ empowers partners, providers, payers, and patients to seamlessly embed true interoperability directly into their applications and workflows. Like a cellphone connecting effortlessly to any network, Kno2 Connected™ technology securely connects you across healthcare, unlocking your ability to use clinical information to drive impactful outcomes. From enhancing business fundamentals and improving provider and patient experiences, to addressing healthcare's greatest challenges, being Kno2 Connected™ is your key to unlocking your full potential and accelerating digital transformation in healthcare.

Kno2 has and will continue to connect to various networks, platforms or EHRs to drive depth and width to our platform that deepens the value of the Communication API, Directory API and/or Capabilities API. Connections that Kno2 chooses to complete are selected based upon the coverage, workflow, or value that connection drives to a broad audience and its impact to solving healthcare's biggest problems.

With the complexity of the healthcare communication landscape, all you need to know is that you are Kno2 Connected™. When your EHR is Kno2 Connected™, comprehensive communication doesn't demand your attention—it enables your excellence. Behind every seamless patient transition, every complete clinical picture, every effortless care coordination moment, Kno2 is working invisibly to make the impossible feel inevitable.

The Technology You Don't Think About - The Invisible Advantage

The most profound transformations in healthcare happen quietly, behind the scenes, in the seamless flow of information that enables everything else to work more efficiently. When you become Kno2 Connected™, you're not just adopting technology—you're joining an ecosystem where clinical information flows freely, care coordination happens effortlessly, and your customer's potential is finally unlocked.

You don't see the complex orchestration of data moving between systems. You don't notice the APIs working tirelessly to ensure information arrives exactly where it needs to be. You don't think about interoperability standards or compliance frameworks.

What you see is what's possible: providers fully prepared at every visit, clinical assessments and treatment plans that reflect the complete clinical picture, complete information to manage the most complex patients, a more efficient, effective and safe care environment that improved outcomes and positions your organization for long-term success in an evolving healthcare landscape.

This is the power of being Kno2 Connected™. This is healthcare without barriers. This is what happens when technology, hidden behind the scenes, works, and possibilities emerge.

Thank you for your partnership with Kno2. We look forward to empowering your technology to transform and evolve how care is delivered!

Brand Promise

“Kno2 Connected™” signifies:

- Seamless healthcare communication integration
- Adherence to industry standards and protocols
- Enhanced interoperability capabilities
- Validated compatibility with the Kno2 ecosystem

Applicability

These guidelines apply to all Kno2 Integrated Partners, including but not limited to:

- Electronic Health Records (EHRs)
 - Private Labeled Partners
- Digital Health Platforms
- Office Technology Partners
- Enterprise End Users

Kno2 Connected Attribution

The phrase “Kno2 Connected™” must be clearly visible and prominently used in any public facing communication where the partner references the integrated product which is connected by Kno2's APIs, any of the networks to which by integration they have access or any connectivity-based promotions, including but not limited to:

- Websites
- Brochures
- Videos
- Social media posts
- Advertisements

- Webinars
- Public announcements and communications

It is by being connected to the Kno2 API and the networks, services and offerings that sit behind it that partners and their customers are able to access national networks and gain access to clinical information under appropriate purposes of use.

Usage Guidelines

When referencing Kno2 or your product that is Kno2 Connected™, partners must:

- Always use “Kno2” as one word.
- Include the registered trademark symbol (®) after the first reference to Kno2.
- Never abbreviate Kno2 (e.g., K2).
- Always include Kno2 Connected™ after the product name

General Messaging Examples

- " <Insert Product Name> is Kno2 Connected™."
- " <Insert Product Name> is connected by Kno2®."

Private Label Guidelines for Private Label Partners:

- Clearly reflect the “Kno2 Connected™” phrase within the user experience.
- Include Kno2 brand attribution and icon prominently at the login prompt.
- Name integrated products or solutions clearly and effectively.
- Use brand statements emphasizing the solutions' value and interoperability achievements.

QHIN and National Connectivity Messaging

It is solely through your connection to the Kno2 API that you or your customers have access to the National networks for health information exchange. Any mention of a contracted partner's ability to connect to these national networks through the Kno2 API must reference and acknowledge that relationship whether internally to a partner's customer or externally for the purpose of general marketing.

For clarity all Kno2 contracted partners utilizing QHIN services or any of our national connectivity networks, must use the following phrases in external communications (social media, website, press releases, emails, etc.) involving national interoperability, or querying networks.

QHIN Messaging Examples:

- <Insert Organization Name> has selected Kno2 as their national healthcare communication infrastructure, including QHIN services."
- <Insert Organization Name> is excited to announce our partnership with Kno2 as our official QHIN partner!
- <Insert Organization Name> handles messy point-to-point integrations, so you don't have to! Our connection and connectivity through Kno2, allows for one API connection that connects you to all!
- <Insert Organization Name> is able to query patients on demand through our partnership with Kno2!

Kno2 Connected™ Logo Usage Specifications

Kno2 Connected™ Logos

- Preferred Logo: The full-color Kno2 icon with blue dots surrounding is always preferred

- Secondary Option: The full-color Kno2 icon with white dots surrounding may be used if needed.

Logo Minimum Size

The minimum size specifications ensure that the logo is always legible. Remember to maintain the correct aspect ratio when scaling the logo:

- Minimum size (in print) is 1 inch with clear space
- Minimum size (on screen) is 120x

Color Palette: Accent

Maintain strict adherence to Kno2 brand colors to ensure brand consistency.

The Kno2 icon/mark uses a trio of blue with overlapping gradient. The Kno2 logo color palette identifies the predominant colors.

Top Triangle
R25 G167 B222
HEX #19a7de
C89 M25 Y0 K13

Middle Triangle
